

I would like to know why I was denied a D-link VP because I already have Sorenson VP. Am I just limited to one??? I would like to have choices of using different VRS. How can you tell if a person already had a Sorenson VP or not? What will happen if a person with Sorenson VP did not tell the truth about having one before getting a D-Link VP? It seems that Sorenson has blocked the use of other VRS. I was told that a person could not have both Sorenson and D-Link VP. Is this true? Can you clear this? Thank you!
